ABOUT ME

AI Engineer focused on building intelligent applications using Python, FastAPI, Generative AI, LLMs, and Agentic AI technologies. Experienced in developing AI-powered systems, backend APIs, and full-stack applications using modern technologies including React, Next.js, Node.js, and MongoDB. Passionate about building practical AI solutions, exploring intelligent agents, solving real-world problems, and continuously learning emerging AI technologies.

SKILLS

AI & Generative AI: LLMs, Generative AI, Agentic AI, AI Agents, Prompt Engineering, AI APIs

Programming: Python, JavaScript (ES6+)

AI Backend: FastAPI, REST APIs, Pydantic, SQLAlchemy

Frontend: React.js, Next.js, HTML, CSS

Backend: Node.js, Express.js

Databases: MongoDB, MySQL, PostgreSQL, SQLite

AI & Development Tools: Git, GitHub, Postman, VS Code, Jupyter Notebook

Full Stack Expertise: MERN Stack, API Integration, Authentication, Database Design

Soft Skills: Team Leadership, Team Collaboration, Team Management, Communication, Problem Solving

PROJECTS

Prison Management System

Tech Stack: Next.js

- Built a full-stack system to manage prisoner records, staff data, and facility operations.
- Implemented CRUD functionality with secure data handling and role-based structure.
- Designed responsive UI for efficient data management and usability.

TaxEase Nepal

- Developed during a hackathon Asianhack2025 with team name codeions designed to simplify Nepalese taxation processes.
 - Collaborated with a team to prototype a web solution
 - Focused on user experience and data visualization using React.js

Feedback Mystery Message App

Tech Stack: Next.js, MongoDB, Authentication (JWT/Session)

- Created an anonymous messaging platform where users can send and receive hidden messages.
- Implemented secure authentication and message handling system.
- Designed clean and interactive UI for user engagement.

Product Inventory App

Tech Stack: MERN Stack

- Built an inventory management system to track products, stock levels, and updates.
- Added structured database design for efficient product tracking.

WORK EXPERIENCE

Stratigo collectives - Full Stack Intern

- Assisted in developing and maintaining modern web applications using JavaScript and React-based technologies.
- Collaborated with team members to improve UI responsiveness and overall user experience.

Sagea – AI Engineer Intern | 2026

Develop AI-powered applications using Python, FastAPI, and modern AI/LLM technologies
Integrate AI models and APIs, build intelligent agentic systems, and optimize application performance.

EDUCATION

B.Sc. CSIT – Veda College, Lalitpur (2022 – Present)

Relevant Coursework: Data Structures, Physics, Operating Systems, Database Management, Object-Oriented Programming, Software Engineering...

+2 Science – Golden Gate International College, Kathmandu(2020 – 2022)

Completed Higher Secondary education in Science with a strong foundation in Physics, Chemistry, and Mathematics.
